

TUT-60M Mechanical Turnstiles

The Ins & Outs of Crowd Control

When it comes to handling high volume crowds, Boon Edam's TUT-60 mechanical turnstiles have every detail covered. All TUT-60M series turnstiles can be used to control one- or two-way traffic, providing years of reliable, trouble-free operation.

Featuring a heavy duty modular mechanism, TUT 60M turnstiles are ideal for stadiums, arenas or other "busy" settings. These mechanically operated turnstiles are supplied with a rugged, five-digit

resettable register, which ensures an accurate and reliable count of patrons. Available in your choice of cabinet construction.

TUT-60MC – Carbon Steel Cabinet • TUT-60MS – Stainless Steel Cabinet

Your **Security.** Our **Solution.**

Construction

- “S” model cabinets made from 16 gauge 304 stainless steel, polished to a 4B finish
- “C” model” cabinets made from 16 gauge carbon steel, powder coated (black standard; RAL colors optional); have a lockable stainless steel cover with concealed hinges
- Heavy duty modular operating mechanism ensures reliable performance and minimizes maintenance
- Standard self-centering feature automatically returns arm assembly to home position after each pass, regardless of force used to pass through
- All components are cadmium plated for long life
- Two lockable access doors conceal anchoring and electrical harness wiring
